Why trade with cashback?

Trading with an "ordinary" inviter (or without an inviter).

OBVIOUS APPEALER

Answer yourself honestly to the question: what do you get from the person whose link you registered and traded on exchanges?

Maybe you don't even know him. Or registered through some blogger's link. With 99% probability, you get nothing from the inviter but a "thank you" and vague promises. So you're losing hundreds and thousands of dollars every month. And the inviter - makes money on every deal you make.
